Vayu supports energy efficiency

Energy Scoping Survey

Objective

A survey was carried out with the aim of identifying high level opportunities for potential energy saving, focusing on the more compelling opportunities.

Solution

After a full site inspection with a company representative, potential energy savings were documented in a detailed report.

The report highlighted potential savings, implementation costs and explained how the measures could be implemented.

Result

Fifteen energy saving measures with significant potential to reduce electricity use were identified, putting estimated cost savings at €75,000.

Opportunities were categorized as low, medium and high payback.

Savings

€75,000

Per annum
